Basic User Password

(BasicUserPwd)

Password used for logging in with basic user functionality.
Leave blank if a password is not required for the basic user.

Advanced User Password

(AdvancedUserPwd)

Password used for logging in with advanced user functionality.
Advanced functionality cannot be used if this password is not
provided.

Admin User Password

(AdminPwd)

Password used for logging in with admin user functionality.

Question - Advanced or Basic User

(Question_AdvBasicUser)   Is this ePoll Book being used at the VAT table?

Question asked to allow poll worker to selecting advanced or
basic user.
This question is presented if there is no login password setup
for the advanced user.

Basic User Ttile

(BasicUserTitle)   PEO

Title displayed when logged in as a basic level user.

Advanced User Title

(AdvancedUserTitle)   VAT

Title displayed when logged in as an advanced level user.

Enter Voting Location at Login

(EnterVoteLoc)   3

Determines how the location information will be provided for
looking up voters.
0 = Do Not need any voting location for looking up voters.
1 = Enable user to enter a voting location at time of login.
2 = Enable user to enter a voting location at time of login and
enable entering a location by scanning a barcode for election
day mode.
3 = For election day mode - by default use the voting location
provided at the time of registration.

Location Based Searches

(VoteLocSrch)   1

Who can see voters outside of the voting location entered at
login? The voters displayed from a search can be limited to
only voters within the voting location entered at login OR
voters for the entire County can be displayed in the search by
default.
0 = NO USERS can see voters outside the specified voting
locations
1 = ALL USERS can see all voters in the search
2 = Only ADVANCED USERS can see the voters outside the
specified locations

Use Voting Location for Eligibility	
(UseLocForEligibility)	1
Set this to 1 to use the voting location entered at login to determine voter eligibility. Set this to 0 for early voting or vote centers where any voter can check-in at any location. 0 = NO 1 = YES	
Use Group for Location Lookup	
(UseGrpForLocLookup)	0
Should the Group be used to lookup the voting location address information. 0 = NO, Do not use Group 1 = YES, Use Group	
Select Printer at Login	
(SelectPrinterAtLogin)	0
Option to select a printer at the time of login. 0 = Do not enable printer selection step 1 = Enable printer selection for all users 2 = Enable printer selection for advanced users only NOTE: This is NOT the printer for BOD.	
Device Unlock / LockAuthorization	
(DeviceUnlockAuth)	2
At the beginning of the day and end of the day, the Touchpad is UNLOCKED and LOCKED. This process can be setup to require passwords. 1 = Require ONE PASSWORD to unlock device 2 = Require TWO PASSWORDS to unlock device 3 = Require NO PASSWORD to unlock device	
Device Unlock Instruction	
(DeviceUnlockMsg) Instruction message displayed on the Unlock Device step.	This device is currently locked.To start processing voters, enter both passwords, then touch the UNLOCK DEVICE button.
Device Unlock / Lock Password #1	
(DeviceUnlockPw1)	
FIRST PASSWORD required for unlocking / locking the device.	
Device Unlock / Lock Password #2	
(DeviceUnlockPw2)	
SECOND PASSWORD required for unlocking / locking the device.	
Device Lock Instruction	
(DeviceLockMsg) Instruction message displayed on the Lock Device step.	Enter passwords then touch the LOCK DEVICE button to continue.

Security For - Check-In Totals

(CheckInTotalsSecurity)   1

The Check-In Totals function displays a summary of all
check-ins completed. The information is summarized in a
variety of ways and is useful in ballot accounting functions.
Use this parameter to setup who has security to use the
Check-In Totals function.
0 = NO USER can view Check-In Totals
1 = ALL USERS can view Check-In Totals
2 = Only ADVANCED USERS can view Check-In Totals

Check-In Totals Label Text

(CheckInTotalsLabel)   Check-In Totals

The label text displayed for the blue Check-In Totals button on
the Launchapd and the text displayed in the header caption on
the Check-In Totals screen.

Security For - Check-In Logs

(CheckInLogsSecurity)   1

The Check-In Logs function displays a list of all voters checked
in on the Touchapd or at the Voting Location. Detailed
information is available for each check-in, including
information such as provisional status, spoiled status, ballot
style, etc. Use this parameter to setup who has security to use
the Check-In Logs function.
0 = NO USER can view Check-In Logs
1 = ALL USERS can view Check-In Logs
2 = Only ADVANCED USERS can view Check-In Logs

Check-In Logs Label Text

(CheckInLogsLabel)   Check-In Logs

The label text displayed for the blue Check-In Logs button on
the Launchapd and the text displayed in the header caption on
the Check-In Logs screen.

Security For - Precinct Register

(PrecRegSecurity)   0

The Precinct Register function displays a list of all voters
eligible to vote at the voting location with a current voting
status for each. From this function time-based check-in reports
can be printed. Use this parameter to setup who can use the
Precinct Register function.
0 = NO USER can view Precinct Register
1 = ALL USERS can view Precinct Register
2 = Only ADVANCED USERS can view Precinct Register

Precinct Register Label Text

(PrecRegLabel)   Poll Register

The label text displayed for the blue Precinct Register button
on the Launchapd and the text displayed in the header caption
on the Precinct Register screen.

Security For - Voting Location Lookup

(PrecLookupSecurity)   1

The Voting Location Lookup function allows searching for a voting location based on a voter address and displays the voting location address and direction information. Use this parameter to setup who can use the Voting Location Lookup function.
0 = NO USER can use Voting Location Lookup
1 = ALL USERS can use Voting Location Lookup
2 = Only ADVANCED USERS can use Voting Location Lookup

Voting Location Lookup Label Text

(PrecLookupLabel)   Precinct Lookup

The label text displayed for the blue Voting Location Lookup button on the Launchapd and the text displayed in the header caption on the Voting Location Lookup screen.

Security For - Spoil and Re-Issue Ballot

(SpoilBallotSecurity)   1

The Spoil Ballot function allows users to spoil a voter ballot when the ballot has been issued incorrectly or the voter has made a mistake and requires a new ballot. Use this parameter to setup who has security to spoil and re-issue a ballot.
0 = NO USER can spoil and re-issue a ballot
1 = ALL USERS can spoil and re-issue a ballot
2 = Only ADVANCED USERS can spoil and re-issue a ballot

Spoil Ballot Label Text

(SpoilBallotLabel)   Soil / Defaced Ballot

The label text displayed for the blue Spoil Ballot button on the Launchapd and the text displayed in the header caption on the Spoil Ballot screen.

Security for - Update Absentee

(UpdateAbsenteeSecurity)   2

The Update Absentee function allows users to update the absentee status for voters. This can be done one voter at a time or by scanning a barcode with multiple voter records. Use this parameter to setup who has security to use the Update Absentee function.
0 = NO USER can view Update Absentee
1 = ALL USERS can view Update Absentees
2 = Only ADVANCED USERS can view Update Absentee

Update Absentee Label Text

(UpdateAbsenteeLabel)   Update Absentee

The label text displayed for the blue Update Absentee button on the Launchapd and the text displayed in the header caption on the Update Absentee screen.

My Session Label Text

(MySessionLabel)   Device Info / Logout

The label text displayed for the blue My Session button on the Launchapd and the text displayed in the header caption on the My Session screen.

Admin Label Text

(AdminLabel)   Admin

The label text displayed for the blue Admin button on the
Launchapd and the text displayed in the header caption on the
Admin screen.

Re-Print Label Text

(RePrintLabel)

The label text displayed for the blue Re-Print button on the
Launchapd and the text displayed in the header caption on the
Re-Print screen.

Security For - Help Guide

(HelpGuideSecurity)   1

The Help Guide function allows users to select documents and
videos for viewing from a pre-defined list. Use this parameter
to setup who has security to use the Help Guide function.
0 = NO ONE has access to Help Guide
1 = ALL users have access to Help Guide
2 = ONLY Advance Users have access to Help Guide

Help Guide Label Text

(HelpGuideLabel)   Help Guide

The label text displayed for the blue Help Guide button on the
Launchapd and the text displayed in the header caption on the
Help Guide screen.

Security for - Wait Time

(WaitTimeSecurity)   0

The Wait Time function allows users to update the wait time
for the location. Use this parameter to setup who has security
to use the Wait Time function.
0 = NO USER can view Wait Time
1 = ALL USERS can view Wait Time
2 = Only ADVANCED USERS can view Wait Time

Wait Time Label Text

(WaitTimeLabel)   Wait Time

The label text displayed for the blue Wait Time button on the
Launchapd and the text displayed in the header caption on the
Wait Time screen.

Ballot Inventory Security

(BallotInvSecurity)   0

Security for Ballot Inventory.
0 = NO USER can view Ballot Inventory
1 = ALL USERS can view Ballot Inventory
2 = Only ADVANCED USERS can view Ballot Inventory

Ballot Inventory Label

(BallotInvLabel)   Ballot Inv

The label text displayed for the blue Ballot Inventory button on
the Launchapd and the text displayed in the header caption on
the Voting Location Lookup screen.

FAQs Security

(FAQsSecurity)   1

Security for FAQs Button.
0 = NO ONE has access to FAQs
1 = ALL users have access to FAQs
2 = ONLY Advance Users have access to FAQs

FAQs Label

(FAQsLabel)   Phone Numbers

Label for FAQs page

ACFN Security

(ACFNUpdateSecurity)   2

Security for ACFN.
0 = No user can access ACFN changes.
1 = All users have access to ACFN changes.
2 = Only advances users have access to ACFN changes.

Change skin

(SkinType)   1

(Only for 3.3.8 and above) Changes the look of the launchpad.
1 = Original menu type (with blue buttons)
2 = New menu type (large buttons)

Update ACFN Label

(UpdateACFNLabel)   Update Ack Card

The label text displayed for the blue Update ACFN button on
the Launchapd and the text displayed in the header caption on
the Update ACFN screen.

No Valid Photo ID Red Button

(NoPhotoID)   1

This parameter will control the display of the RED - No Photo
ID button displayed on the Launchpad.
0 = DO NOT DISPLAY Red Photo ID Button - Photo ID is not
required.
1 = Display Red Photo ID button – Photo ID is required for all
voters.
2 = DO NOT DISPLAY Red Photo ID Button - Photo ID is
required only for voters marked with Photo ID Required = Y

No Photo ID Processing

(NoPhotoIDProcess)   P

How should a voter condition of No Photo ID provided be
handled.
P = Issue a provisional ballot
C = Handle as a voter challenge
R = Issue a regular ballot

No Photo ID short description

(NoPhotoIDShortDesc)   No Valid ID

Displayed as the provisional / challenge reason

No Photo ID Basic User Message

(NoPhotoIDBasicUserMsg)   A valid ID is required.Direct voter to the Voter Assistance Table.

Message displayed to basic when user a voter does not have a
valid photo ID

No Photo ID Advanced User Message

(NoPhotoIDAdvUserMsg)

Message displayed to advanced user when a voter does not have a valid photo ID

A valid ID is required.Issue voter a provisional ballot.

No Photo ID Security Setting

(NoPhotoIDSecurity)

Setting that determines which user can process No Photo ID condition.
0 - No User has security
1 - All Users have security
2 - Only Advanced Users have security

2

Select ID type requirement

(SelectIDType)

The YELLOW button is used when the voter does not present a driver license and we need to conduct a manual search. Setting this parameter to 1 will present the user with a list of valid ID types and this information will become part of the check-in log for the voter.
0 = Do NOT track other ID Type
1 = Track other ID Type

1

ID PopUp Message

(IDPopUpMsg)

The text in this parameter is displayed as a BLUE instructional message on the ID Type selection pop-up.

All forms of ID must contain the voter's name. Driver's License/State ID cannot be expired. Other forms of ID must be issued within the last 12 months. See Quick Guide - Acceptable Identification for further information.Voter registration notification is not a valid form of ID.

Birth Year / Date Search

(BirthSearchReq)

This parameter controls the functioning of the birth date / year search when doing a manual search.
0 = Birth Date / Year NOT required
1 = At least BIRTH YEAR required
2 = Entire BIRTH DATE required

0

Manual State Search

(ManualStateSrch)

State search is a custom option that can be enabled if a searchable state-wide voter database is available.
0 = State Search is NOT available
1 = State Search is available for ALL USERS
2 = State Search is available for ADVANCED USERS only

0

Automatic State Search

(AutoStateSrch)

State search is a custom option that can be enabled if a searchable state-wide voter database is available. When searching with a driver license, this parameter can be turned on to perform an automatic state search if the voter is not present in the local database.
0 = Automatic State Search is NOT available
1 = Automatic State Search is available for ALL USERS
2 = Automatic State Search is available for ADVANCED USERS only

0

Scan Voter ID Barcode		
(ScanVoterID)	0	
Some documents sent to the voter, such as sample ballot or voter information card, contain a barcode. This option can be turned on to allow scanning the voter id in a 3 of 9 barcode format.		
0 = Voter ID barcode scanning is NOT available		
1 = Voter ID barcode scanning is available		
Voter Fields Order		
(VoterSrchFieldsOrder)	2|3|1	
Use this parameter to setup the order of the search fields for the manual voter search screen. The settings should be separated by a | symbol.		
1 = Birthdate		
2 = Last name		
3 = First name		
Manual Search Options		
(ManualSearchMethod)	1	
Allow all fields for searching or limit search options		
Manual Search Options		
(ManualSearchOptions)	1|2|3	
Use this parameter to setup the which search fields to display. Used in conjunction with ManualSearchMethod = 1 The settings should be separated by a | symbol.		
1 = Last Name & House No		
2 = Last Name & Birth Year		
3 = State Voter ID		
4 = Name and Birth Date		
Voter ID Text		
(VoterIDLabel)	Voter Code	
Use this parameter to change what State Voter ID is called on the search options page		
Blue Driver License Message		
(DLMessage)	Place driver's license barcode inside the red box below	
Blue instruction message displayed on the driver license scanning screen.		
Default State for Driver License		
(DLState)	OH	
The default State for driver license scanning.		
DL Scan No Voter Found Message		
(DLScanNVFMsg)	Voter information not found using the Driver License.NO PROBLEM!Try finding the voter using a manual search.Touch the MANUAL SEARCH button to continue.	
Message displayed if the driver license scan does not work well to find a voter.		
Display Party		
(DisplayParty)	0	
Display the voter party affiliation on the voter screens.		
0 = DO NOT display voter party		
1 = Display voter party		

Display Gender

(DisplayGender)   0

Display the voter gender on the voter screens.
0 = DO NOT display voter gender
1 = Display voter gender

Display Race

(DisplayRace)   0

Display the voter race on the voter screens.
0 = DO NOT display voter race
1 = Display voter race

Display Voters County

(DisplayCounty)   1

Display the voter residence address county on the voter
screens. This is useful when State Search is available and a
voter from another county may be searched.
0 = DO NOT display voter residence county
1 = Display voter residence county

Group Label Text

(GrpLabel)   Split

The Group is used to represent precinct splits. This label can be
configured to name the "Group" field as something else, such
as Split, Segment, etc.

Display Birth Date

(DisplayBirthDate)   2

Display the voter birth date on the voter screens.
0 = Do NOT show the birth date.
1 = Show the entire birthdate.
2 = Show ONLY the birth year.

Display Group

(DisplayGrp)   1

Display the voter group field on the voter screens.
0 = Do NOT show the group.
1 = Do show the group.

Allow Party Updates

(ModifyParty)   0

How is the voter party information handled when editing /
adding voter information. This option is not the same as
allowing a voter to declare a party during check-in.
0 = DO NOT allow updating party affiliation in new or edit
mode (party will not be displayed in new or edit mode)
1 = Allow updating the party in new and edit mode
2 = Allow updating the party in NEW mode, but NOT IN EDIT
mode (party will be displayed in edit mode)
3 = Allow updating the party in NEW mode only (party will not
be displayed in edit mode)

Allow Birth Date Updates

(ModifyBDate)   0

0 = NO, Do not allow updating the birth date
1 = YES, Allow updating the birth date
2 = NO, Do not allow updating the birth date and do not
display the field while updating

Allow Editing Mailing Address

(EditMailingAddress) 0

0 = DO NOT allow editing Mailing Address
1 = Allow editing Mailing Address

Voter Validation Age

(BDateValidateAge) 17

Age voter is allowed to vote

Voter Validation Date

(BDateValidateDate) 11/08/2015

Date voter has to be valid age to vote

Enable PreDirection button

(AllowPreDirection) 1

This parameter determines if PreDirection can be entered on
the voter address update screen.
0 = DISABLE PreDirection button
1 = ENABLE PreDirection button

Voter Identification Message

(VoterIDMsg) Ask voter: What is your current address?Does the information
the voter provided match the information above?

Text for blue message displayed on voter identification screen.

Red Search Again Button Text

(BtnRedVID_SearchAgain) WRONG VOTER, SEARCH AGAIN

Text for RED search again button on Voter Identification step.

Yellow Update Info Button Text

(BtnYellowVID_UpdateInfo) NO, NEEDS CHANGES

Text for YELLOW update voter information button on Voter
Identification step.

Green Continue Button Text

(BtnGreenVID_Continue) YES, CONTINUE

Text for GREEN continue / information is correct button on
Voter Identification step.

No Voter Found Button Message

(BtnYellowVID_NewVoter) NO VOTER FOUND

Text for YELLOW voter not found button on Voter
Identification step.

Voter Eligible GREEN Message - Basic User

(BasicEligibilityMsgElig) Voter is eligible to vote. Continue to next screen to process
voter.

Message displayed in GREEN when voter is eligible to vote.
This is the message for the basic user.

Voter Not Eligible RED Message - Basic User

(BasicEligibilityMsgNotElig) Voter is not eligible to vote a regular ballot. Read instructions
below.

Message displayed in RED when voter is NOT eligible to vote.
This is the message for the basic user.

Voter Eligible GREEN Message - Advance User

(AdvanceEligibilityMsgElig) Voter is eligible to vote. Continue to next screen to process
voter.

Message displayed in GREEN when voter is eligible to vote.
This is the message for the advanced user

Voter Not Eligible RED Message - Advance User	
(AdvanceEligibilityMsgNotElig)	Voter is not eligible to vote a regular ballot. Read instructions below.
Message displayed in RED when voter is NOT eligible to vote. This is the message for the advanced user.	
Voter Update Button Label	
(Btn_VoterUpdate)	UPDATE VOTER INFO
Text for Voter Update button available on the Voter Eligibility step. This text will be used for the green Voter Update button and also the button available under the yellow More Options menu.	
Voter Transfer Button Text	
(Btn_VoterTransfer)	Re-Direct Voter
Text for Voter Transfer button available from the yellow More Options menu on the Voter Eligibility step. This label will also be used as the caption for the Voter Transfer screen. Enter uppercase then lowercase for each word.	
Status Not Valid Processing	
(StatusNotValidProcess)	P
How should a voter condition of Status Not Valid be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Status Not Valid short description	
(StatusNotValidShortDesc)	Status Not Valid
Displayed as the provisional / challenge reason	
Status Not Valid Basic User Message	
(StatusNotValidBasicUserMsg)	Voter status is not valid.Direct voter to the Voter Assistance Table.
Message displayed to basic user when the voter status is not valid.	
Status Not Valid Advanced User Message	
(StatusNotValidAdvUserMsg)	Voter status is not valid.Issue the voter a provisional ballot.
Message displayed to advanced user when the voter status is not valid.	
Status Not Valid Security Setting	
(StatusNotValidSecurity)	2
Setting that determines which user can process Status Not Valid condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	
Valid Status Code	
(ValidStatusCode)	A,ACT,I,INA
List of valid Status codes separated by commas.	

Reg After Book Closing Processing	
(RegDateProcess)	P
How should a voter condition of voter registered after book closing be handled. P = Issue a provisional ballot C = Handle as a voter RegDate R = Issue a regular ballot	
Reg After Book Closing short description	
(RegDateShortDesc)	Reg After Cut-Off
Displayed as the provisional / challenge reason	
Reg After Book Closing Basic User Message	
(RegDateBasicUserMsg)	Voter registered after book closing date.Direct voter to the Voter Assistance Table.
Message displayed to basic user if the voter has registered after book the book closing date.	
Reg After Book Closing Advanced User Message	
(RegDateAdvUserMsg)	Voter registered after book closing date.Issue the voter a provisional ballot.
Message displayed to basic user if the voter has registered after book the book closing date.	
Reg After Book Closing Security Setting	
(RegDateSecurity)	2
Setting that determines which user can process Reg After Book Closing condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	
Challenged Processing	
(ChallengeProcess)	R
How should a voter condition of Challenged be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Challenged short description	
(ChallengeShortDesc)	Challenged
Displayed as the provisional / challenge reason	
Challenged Basic User Message	
(ChallengeBasicUserMsg)	Voter eligibility has been challenged.Direct voter to the Voter Assistance Table
Message displayed to basic user when the voter eligibility has been challenged.	
Challenged Advanced User Message	
(ChallengeAdvUserMsg)	Voter eligibility has been challenged.Call 632-7000 and press 1 for further instructions.
Message displayed to advanced user when the voter eligibility has been challenged.	
Challenged Security Setting	
(ChallengeSecurity)	2
Setting that determines which user can process Challenged condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	

Already Voted Processing	
(AlreadyVotedProcess)	P
How should a voter condition of Already Voted be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Already Voted short description	
(AlreadyVotedShortDesc)	Voter Already Voted
Displayed as the provisional / challenge reason	
Already Voted Basic User Message	
(AlreadyVotedBasicUserMsg)	Voter already voted.Direct voter to the Voter Assistance Table.
Message displayed to basic user when a voter has already Already Voted.	
Already Voted Advanced User Message	
(AlreadyVotedAdvUserMsg)	Voter already voted.Issue the voter a provisional ballot.
Message displayed to advanced user when a voter has already Already Voted.	
Already Voted Security Setting	
(AlreadyVotedSecurity)	2
Setting that determines which user can process Already Voted condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	
Already Early Voted Processing	
(EarlyVotedProcess)	P
How should a voter condition of Already Early Voted be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Already Early Voted short description	
(EarlyVotedShortDesc)	Early Voted
Displayed as the provisional / challenge reason	
Already Early Basic User Message	
(EarlyVotedBasicUserMsg)	Voter already voted at an early voting location.Direct voter to the Voter Assistance Table.
Message displayed to basic user when a voter has already early voted.	
Already Early Advanced User Message	
(EarlyVotedAdvUserMsg)	Voter already voted at an early voting location.Issue the voter a provisional ballot.
Message displayed to advanced user when a voter has already early voted.	
Ealry Voted Security Setting	
(EarlyVotedSecurity)	2
Setting that determines which user can process Early Voted condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	

Already Absentee Voted Processing	
(AbsenteeVotedProcess)	P
How should a voter condition of Already Absentee Voted be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Already Absentee Voted short description	
(AbsenteeVotedShortDesc)	Absentee Ballot Requested
Displayed as the provisional / challenge reason	
Already Early Basic User Message	
(AbsenteeVotedBasicUserMsg)	Voter has requested an absentee ballot.Direct voter to the Voter Assistance Table.
Message displayed to basic user when a voter has already Absentee Voted.	
Already Early Advanced User Message	
(AbsenteeVotedAdvUserMsg)	Voter has requested an absentee ballot.Issue the voter a provisional ballot.
Message displayed to advanced user when a voter has already Absentee Voted.	
Absentee Voted Security Setting	
(AbsenteeVotedSecurity)	2
Setting that determines which user can process Absentee Voted condition. 0 - No User has security 1 - All Users have security 2 - Only Advanced Users have security	
Absentee Request Not Returned Processing	
(AbsRequestedProcess)	P
How should a voter condition of absentee requested but not returned be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Absentee Request Not Returned short description	
(AbsRequestedShortDesc)	Absentee Ballot Requested
Displayed as the provisional / challenge reason	
Absentee Request Not Returned Basic User Message	
(AbsRequestedBasicUserMsg)	Voter has requested an absentee ballot.Direct voter to the Voter Assistance Table.
Message displayed to basic level user when absentee ballot is requested, but not returned.	
Absentee Request Not Returned Advanced User Message	
(AbsRequestedAdvUserMsg)	Voter has requested an absentee ballot.Issue the voter a provisional ballot.
Message displayed to advanced level user when absentee ballot is requested, but not returned.	

Absentee Requested Security Setting

(AbsRequestedSecurity)   2

Setting that determines which user can process Absentee
Requested condition.
0 - No User has security
1 - All Users have security
2 - Only Advanced Users have security

Track Absentee Surrender

(AbsTrackSurrender)   0

Enable workflow for tracking any absentee ballots surrendered
0 = NO, Enable tracking
1 = YES, Enable tracking

Absentee Surrender Message

(AbsSurrenderMessage)   Has the voter surrendered the absentee ballot?

Message displayed on the Surrender Absentee screen

No Ballot Style Processing

(NoBallotStyleProcess)   P

How should a voter condition of maximum ballots issued be
handled.
P = Issue a provisional ballot
C = Handle as a voter challenge
R = Issue a regular ballot

No Ballot Style short description

(NoBallotStyleShortDesc)   No Ballot Style

Displayed as the provisional / challenge reason

No Ballot Style Basic User Message

(NoBallotStyleBasicUserMsg)   Ballot style could not be determined. Voter precinct not in
                                       election.Direct voter to the Voter Assistance Table.
Message displayed to basic user when the voter has no ballot
style assigned.

No Ballot Style Advanced User Message

(NoBallotStyleAdvUserMsg)   Ballot style could not be determined. Voter precinct not in
                                     election.Call the Hamilton County BOE at 632-7000.
Message displayed to advanced user when the voter has no
ballot style assigned.

No Ballot Style Security Setting

(NoBallotStyleSecurity)   2

Setting that determines which user can process No Ballot Style
condition.
0 - No User has security
1 - All Users have security
2 - Only Advanced Users have security

Max Ballots Issued Processing

(MaxBallotsProcess)   P

How should a voter condition of maximum ballots issued be
handled.
P = Issue a provisional ballot
C = Handle as a voter challenge
R = Issue a regular ballot

Max Ballots Issued short description	
(MaxBallotsShortDesc)	Max Ballots Issued
Displayed as the provisional / challenge reason

2

Already Voted Processing

(ProvVotedProcess)

How should a voter condition of Voter already voted a provisional ballot be handled.
P = Issue a provisional ballot
C = Handle as a voter challenge
R = Issue a regular ballot

P

Prov Voted short description

(ProvVotedShortDesc)

Displayed as the provisional / challenge reason

Prov Voted

Basic User Prov voted message

(ProvVotedBasicUserMsg)

Message displayed to Basic user when the voter has already voted a provisional ballot.

Voter has already voted a Provisional Ballot this election.

Advance user Prov voted message

(ProvVotedAdvUserMsg)

Message displayed to Advanced user when the voter has already voted a provisional ballot.

Voter has already voted a Provisional Ballot this election.

Prov Voted Security Setting

(ProvVotedSecurity)

Setting that determines which user can process the already voted provisional condition.
0 - No User has security
1 - All Users have security
2 - Only Advanced Users have security

2

Provisional Tracking Number

(ProvTrackingRequired)

0 = Provisional Tracking Number NOT Required
1 = Provisional Tracking Number Required

0

Provisional Tracking Number Instruction Message

(ProvTrackingMessage)

Instruction message displayed in the blue area on the Provisional Tracking pop-up.

Enter Provisional Tracking Number

Enable Manual Provisionals

(ManualProcessProvVote)

Enable manual provisional processing
0 = DO NOT enable manual provisionals
1 = Enable manual provisionals for all users
2 = Enable manual provisionals for advanced users only

2

Manual Provisional Message

(ManualProvMessage)

Instruction message displayed when processing manual provisional

Call the Hamilton County Board of Elections Help Desk for instructions on processing a manual provisional.

Processing of Voter Challenge

(ProcessChallenge)

0 = Challenge Process Turned Off
1 = ALL USERS can complete challenge process
2 = ONLY ADVANCED USERS can complete challenge process

2

Under Age Processing

(UnderAgeProcess)

How should a voter condition of UnderAge be handled.
P = Issue a provisional ballot
C = Handle as a voter challenge
R = Issue a regular ballot

R

Under Age Short Desc

(UnderAgeShortDesc)

Displayed as the provisional / challenge reason

17 Year Old

Under Age Basic User Message

(UnderAgeBasicUserMsg)

Message displayed to basic user when a voter is Under Age.

Give the voter an Instruction Sheet. Cover the barcode along the side of the ballot with a blue "17 year old voter" sticker. Mark "17" and ballot type on the unscanned envelope and instruct the voter to place the ballot inside the envelope after voting. The ballot cannot be scanned.

Give the voter an Instruction Sheet. Cover the barcode along the side of the ballot with a blue "17 year old voter" sticker. Mark "17" and ballot type on the unscanned envelope and instruct the voter to place the ballot inside the envelope after voting. The ballot cannot be scanned.

Under Age Security

(UnderAgeSecurity)   1

Setting that determines if the Under Age condition is
processed as eligible or ineligible.
0 - No User has security
1 - All Users have security
2 - Only Advanced Users have security

Enable Signature Capture

(GetSignature)   1

0 = NO, Disable signature capture
1 = YES, Enable signature capture

Enable Signature for Provisionals

(GetSignatureProv)   1

0 = NO, Disable signature capture for Provisionals
1 = YES, Enable signature capture for Provisionals

Auto-rotate Screen on Signature Step

(SignatureAutoRotate)   1

0 = NO, Do not auto-rotate on signature step
1 = YES, Auto-rotate on signature step

Voter Oath Message

(VoterOathMessage_English)

Oath displayed to voter on signature step
If oath is required in multiple languages, use the Language
Customizability section.

Signature Done Button Message

(BtnSig_Done_English)   DONE

Text for green button on Voter Signature step. This is the
button the voter touches once they are done signing. Some
possible options here are DONE, I ACCEPT, OKAY.

Verify Signature Message

(VerifySignatureMsg)

Blue instruction message displayed to election worker once
the voter is done signing. The message is displayed at the top
with the voter signature displayed at the bottom.

If current signature matches the signature on file, touch ISSUE BALLOT. If current signature does not match the signature on file, touch SIGNATURE MISMATCH to issue a provisional ballot.

Signature Comparison

(CompareSignature)   1

Setting this option to 1 will display the signature the voter
signs on the iPad and also the signature from the voter
registration record, allowing the election worker to compare
both signatures.
0 = DO NOT enable comparison of signatures
1 = Enable comparison of signatures

Enable Paper Oath

(EnablePaperOath)   0

This option is used to allow the voterto sign on paper rather
than on the iPad. A paper oath sign-in slip can be printed if the
printing options are enabled or a pre-printed form can be
used.
0 = DO NOT enable paper oath
1 = DO enable paper oath
2 = Enable paper oath ONLY for advanced users

Paper Oath Label Text

(PaperOathLabel)   Paper Oath

Text for yellow paper oath button. This button is available if
the user has security to process a signature on paper (set via
the EnablePaperOath parameter).

Paper Signature Instructions

(SignaturePaperMsg)   NOT USED - NO PAPER OATH

Blue instruction message displayed on the Paper Oath pop-up
when the Paper Oath button is touched. This message is
displayed only if the user has the security to process a
signature on paper (set via the EnablePaperOath parameter).

Poll Worker Initials

(CapturePwInitials)   0

Enable workflow for capturing poll worker initials at the time
of voter signature
0 = Poll worker initials not required
1 = Poll worker initials required

Get Signature Header

(GetSigHeader)   Voter Signature

What is displayed for Get Signature header

Enable Signature Mismatch

(EnableSigMismatch)   1

Enable election worker to touch a Signature Mismatch button
when the the voter signature does not match. This can enable
a provisional or other workflow.

Signature Mismatch Button Message

(SigMismatchButtonLabel)   SIGNATURE MISMATCH

Text for yellow Signature Mismatch button available on the
Signature Compare screen.

Signature Mismatch Processing	
(SigMismatchProcess)	P
How should a signature mismatch be handled. P = Issue a provisional ballot C = Handle as a voter challenge R = Issue a regular ballot	
Signature Mismatch short description	
(SigMismatchShortDesc)	Signature Mismatch
Displayed as the provisional / challenge reason	
Signature Mismatch Basic User Message	
(SigMismatchBasicUserMsg)	Voter signature does not match the signature on file. Direct the voter to the Voter Assistance Table.
Message displayed to basic user if they determined that the voter signatures do not match. This message is used only if the option Enable Signature Mismatch is turned on and the basic user does not have security to complete the process.

0 = Poll worker chooses party for voter 1 = Voter chooses party	

Declare Party Message

(PartyDeclarationMsg)

Blue instruction message displayed on the Party Declaration step. This is displayed if we are in an Open Primary and the voter is allowed to select a ballot style / declare a party.

Ask voter what type of ballot?

Ballot Types

(BallotTypes)

Delimeted list of all ballot types that are available and the order they should be displayed in.
1 = Audio Ballot
2 = Paper Ballot
3 = Ballot on Demand
4 = DRE
5 = Absentee
EXAMPLE: To show first show Ballot on Demand and then show Audio Ballot
["3", "1"] -- None of the other options will be visible.

["2"]

Default Ballot Type

(BallotTypeDefault)

Which Ballot Type should be defaulted. Enter 0 for no default.

2

Vote Type Recorded

(VoteType)

Which vote type should be recorded - valid values are
R = ELECTION DAY VOTING
E = EARLY VOTING

R

Ballot Stub Format

(BarcodeFormat)

Format for ballot stub. "s" is style, "n" is number

sssssss nnnnn

Validate Ballot with Barcode

(ValidateBallotWithBarcode)

needs description
1 = Enable Validation of ballot style only
2 = Enable Validation of ballot style and number (across all locations)
3 = Enable Validation of ballot style and number (within single location)

3

Issue Ballot Paper Ballot Instruction

(IssueBallotPaperMsg)

Blue instruction message displayed on the Issue Ballot step when Paper Ballot is selected as the ballot type.

Enter or scan ballot style and stub number. Issue voter ballot then touch CONTINUE to proceed.

Issue Ballot Audio Ballot Instruction

(IssueBallotAudioMsg)

Blue instruction message displayed on the Issue Ballot step when Audio Ballot is selected as the ballot type.

Issue Ballot BOD Ballot Instruction

(IssueBallotBODMsg)

Blue instruction message displayed on the Issue Ballot step when Ballot on Demand is selected as the ballot type.

Issue Ballot DRE Instruction

(IssueBallotDREMsg)

Instruction message displayed on the Issue Ballot step based on ballot type selected.

DRE Ballot Selected. Enter or scan ballot style and stub number. Issue voter ballot then touch COMPLETE CHECK-IN to proceed.

Issue Ballot Button Text

(Btn_IssueBallot)

Text for Issue Ballot button. This text will be used on the Signature Step to guide the election worker to the next step in the processing. If signatures are not required, this text is used for the Issue Ballot button on the Voter Eligibility Step.

Issue Ballot

Issue Ballot Header Caption

(ScrHeaderIssueBallot)

The screen header caption for the Issue Ballot step.

Issue Ballot

Enable Ballot Log Barcode Scanning

(EnableBallotStubBarcodeScanning)

This option enables an option to scan a barcoded ballot stub
0 = No validation
1 = Enable Validation for all ballots
2 = Enable Validation only for provisional ballots

1

Scan Ballot Style/Number Separately

(ScanBallotStyleNumberSeparate)

This option specifies if ballot style and ballot number should be scanned together or separately
0 = Together
1 = Separately

0

Check-in Complete Basic Instruction

(CheckinCompMsg)

Blue instruction message displayed on the last step once check-in is complete.

Great Job!

Check-in Complete Provisional Instruction

(CheckinCompProvMsg)

Istruction message added to last step when issuing a provisional ballot.

Provisional Ballot – Instruct voter to place completed ballot in provisional envelope, then place envelope in eScan side slot. Give voter Hot-line form.

Message displayed to advanced level user when no voter information is found.	

Voter Not Found Security Setting

(VoterNotFoundSecurity)   2

Setting that determines which user can process Voter Not Found condition.

Option For Web Service Spoiling

(WebServiceSpoil)   1

This parameter controls how checked in voters are searched from the Spoil Ballot function. This should be set to 1 for most cases. Option 2 and 3 are useful when the sideways communication is not available at the precinct (when each iPad has its own data plan for connectivity).
1 = Search locally
2 = Search on the web
3 = User chooses

Spoil Search Type

(SpoilSearchType)   1

Determines what fields are visible when searching for a voter to spoil.
1 = Search by last name only.
2 = Search by birth year and last name.
3 = Search by birth date and last name.

Admin Spoil Option

(AdminSpoilOption)   0

Admin Spoiling option.
0 = Do NOT allow admin spoiling.
1 = Do allow admin spoiling.

Spoil Name

(SpoilName)   Soil

What spoil will be identified as throughout pollbook

Enable Voter Location Transfer

(ProcessVoterTransfer)   1

Voter Location Transfer allows
- tracking of voters sent to another voting location.
- updating address changes for voters sent to another location.

0 = DO NOT enable voter transfer
1 = Enable voter transfer for all users
2 = Enable voter transfer for advanced users only

Voter Transfer Location Instruction

(VoterTransferLocationMsg)   Correct precinct and voting location listed below. Allow voter to see map view of voting location if needed.

Instruction message displayed on the Vote Location screen for Voter Transfers.

Voter Transfer Complete Instructions

(VoterTransferCompMsg)   Direct voter to the correct voting location.

Instruction message added to the last step when the voter is being transferred to the correct voting location.

Precinct Not Found Text

(PrecinctNotFoundMsg)   Call the Hamilton BOE at 632-7000 and press 1.

Configurable text for precinct not found message

Precinct Lookup Options

(PrecinctLookupDisplay)   1

Display options for precinct lookup.
0 = DO NOT show map or email
1 = Display map only
2 = Display map AND email

Print Precinct Directions

(PrintPrecinctDir)   0

Option to allow printing for precinct directions when not doing
a voter transfer
0 = Do NOT allow printing for precinct directions
1 = Do allow printing for precinct directions

Voter Transfer Success Message

(VoterTransferSuccessMsg)   Voter successfully redirected

Sets the text of the message that shows after a successful
transfer.

Ballot on Demand Print Server

(BODLink)

The link for sending print message to the ballot on demand
server.

Select Ballot on Demand

(BODSelect)   0

Allow selecting a ballot on demand printer at time of login and
from the My Session page.

Auto Printing

(AutoPrint)   0

0 = DO NOT allow auto printing
1 = Do allow auto printing

Print Check-in Slip

(PrintCheckIns)   0

This option can be used if an air print compatible printer is
available.The Check-in Slip or Authority to Vote slip can be
configured to print at two different points in the check-in
process.
0 = Do not print Check-In slip
1 = Print Check-In Slip at the end of the check-in process
2 = Print Check-in Slip before issuing ballot

Print Check-In Slip Header

(PrintCheckInHeader)   Ballot Style Label

Header label for the Print Check-In step

Print Check-in Slip Instruction Message

(PrintCheckInMessage)   Print the ballot style label. Touch CONTINUE to complete.

Blue instruction message displayed on the Print Check-in Slip
step.

Printing Voter Transfer Slip

(PrintVoterTransfers)   0

This option can be used if an air print compatible printer is
available. At the end of the voter transfer process a transfer
slip will be printed.
0 = Disable printing option for voter transfers
1 = Enable printing option for voter transfers

Print Transfer Slip Header

(PrintTransferHeader)   Re-direct Slip

Header label for the Print Transfer Slip step.

Print Transfer Slip Instruction Message

(PrintVoterTransferMessage)   Print the Re-direct slip. Touch CONTINUE to complete.

Blue instruction message displayed on the Print Voter Transfer
Slip step.

Print Provisional Label

(PrintProvisional)   0

This option can be used if an air print compatible printer is
available. A provisional label will be printed at the end of the
check-in process. This can be attached to the provisional
envelope instead of writing information on the envelope.1 =
DO allow printing for provisionals

Print Provisional Label Header

(PrintProvisionalHeader)   Provisional Label

Header label for the Print Provisional Label step.

Print Provisional Label Instruction Message

(PrintProvisionalMsg)   Print Provisional Label. Touch CONTINUE to complete.

Blue instruction message displayed on the Print Provisional
Label step.

Print Check-in Logs

(PrintCheckInLogs)   0

This option can be used if an air print compatible printer is
available.
A printing option will be available on the Check-In Logs screen.
0 = Disable printing option for check-in logs
1 = Enable printing option for check-in logs

Print Check-in Totals

(PrintCheckInTotals)   0

This option can be used if an air print compatible printer is
available. A printing option will be available on the Check-In
Totals screen. This option also enables the printing of the Start
of Day Totals slip from the Device Unlock step.
0 = Disable printing option for check-in totals
1 = Enable printing option for check-in totals

Print Unlock Device Header

(PrintUnlockDeviceHeader)   Unlock Device

Header label for the Unlock Device Totals Slip step.

Print Unlock Device Instruction Message	
(PrintUnlockDeviceMsg)	Touch SELECT PRINTER to change/select printer.Touch REPRINT if printing did not completeTouch CONTINUE to proceed.
Blue instruction message displayed on the Print Unlock Device step.	
Print Paper Oath Slip	
(PaperOathPrinting)	0
This option can be used if an air print compatible printer is available. This will allow printing a Paper Oath slip that can be used to gather voter signatures for voters that are unable to sign on the screen. 0 = DO NOT allow printing paper oath slip 1 = DO allow printing paper oath slip	
Print EDR Form Header	
(PrintEDRFormHeader)	Print EDR Form Slip
Header label for the Print EDR Form step.	
Print EDR Label Header	
(PrintEDRLabelHeader)	Print EDR Label Slip
Header label for the Print EDR Label step.	
Print Precinct Register

End of Day Log File FTP Server Password

(EodPassword)

FTP Server Password for uploading the end of day log file

Poll Worker Oath Label Text

(PollWorkerOathLabel)

Text for poll worker sign in oath.

I do solemnly swear or affirm under the penalty of perjury that I will support the Constitution of the United States of America and the Constitution of the State of Ohio and its laws; that I have not been convicted of a felony or any violation of the election laws; that I will discharge, to the best of my ability, the duties of The Precinct Election Official in and for this precinct at the election to be held on ELECTIONDATE as required by law and the rules and instructions of the Board of Election of said County; and that I will endeavor to prevent fraud in such election, and will report immediately to said board any violations of the election laws which come to my attention, and will not disclose any information as to how any elector voted which is gained by me in the discharge of my official duties. I hereby also acknowledge that I have received training from the Board of Elections regarding the Secretary of State's ethics policy and Ohio ethics laws, that I will comply with the same, and that failure to comply with the ethics policy or Ohio ethics laws may serve as good and sufficient reason for my removal from my appointed position.
