# Certificate of Conformance

# **ES&S EVS 6.3.0.0**

The voting system identified on this certificate has been evaluated at an accredited voting system testing laboratory for conformance to the *Voluntary Voting System Guidelines Version 1.0 (VVSG 1.0)*. Components evaluated for this certification are detailed in the attached Scope of Certification document. This certificate applies only to the specific version and release of the product in its evaluated configuration. The evaluation has been verified by the EAC in accordance with the provisions of the EAC *Voting System Testing and Certification Program Manual* and the conclusions of the testing laboratory in the test report are consistent with the evidence adduced. This certificate is not an endorsement of the product by any agency of the U.S. Government and no warranty of the product is either expressed or implied.

Product Name: EVS

# Scope of Certification

This document describes the scope of the validation and certification of the system defined above. Any use, configuration changes, revision changes, additions or subtractions from the described system are not included in this evaluation.

### Significance of EAC Certification

An EAC certification is an official recognition that a voting system (in a specific configuration or configurations) has been tested to and has met an identified set of Federal voting system standards. An EAC certification is **not**:

- An endorsement of a Manufacturer, voting system, or any of the system's components.
- A Federal warranty of the voting system or any of its components.
- A determination that a voting system, when fielded, will be operated in a manner that meets all HAVA requirements.
- A substitute for State or local certification and testing.
- A determination that the system is ready for use in an election.
- A determination that any particular component of a certified system is itself certified for use outside the certified configuration.

# Representation of EAC Certification

Manufacturers may not represent or imply that a voting system is certified unless it has received a Certificate of Conformance for that system. Statements regarding EAC certification in brochures, on Web sites, on displays, and in advertising/sales literature must be made solely in reference to specific systems. Any action by a Manufacturer to suggest EAC endorsement of its product or organization is strictly prohibited and may result in a Manufacturer's suspension or other action pursuant to Federal civil and criminal law.

# System Overview

The ES&S EVS 6.3.0.0 voting system is a modification of the EVS 6.2.0.0 voting system, certified on December 23, 2021. The EVS 6.3.0.0 voting system contains modifications to Electionware, ExpressVote versions 1.0 and 2.1, ExpressVote XL, ExpressTouch, DS200, and DS950. It also introduces the DS300, a polling place scanner and tabulator. EVS 6.3.0.0 is composed of software applications, central count location devices and polling place devices with accompanying firmware, and COTS hardware and software:

**Electionware®** election management software is an end-to-end election management software application that provides election definition creation, ballot formation, equipment configuration, result consolidation, adjudication, and report creation. Electionware is composed of five software groups: Define, Design, Deliver, Results, and Manage.

**ExpressVote® XL** is a hybrid paper-based polling place voting device that provides a full-face touch screen vote capture interface that incorporates the printing of the voter's selections as a cast vote record and tabulation scanning in a single unit.

**ExpressTouch**® is a DRE voting system which supports electronic vote capture for all individuals at the polling place.

**ExpressVote® Hardware 1.0** is a hybrid paper-based polling place voting device that provides touch screen vote capture that incorporates the printing of the voter's selections as a cast vote record to be scanned for tabulation in any one of the ES&S precinct or central tabulators.

**ExpressVote® Hardware 2.1** is a hybrid paper-based polling place voting device that provides touch screen vote capture that incorporates the printing of the voter's selections as a cast vote record to be scanned for tabulation in any one of the ES&S precinct or central tabulators. There are two separate versions of ExpressVote HW2.1: version 2.1.0.0 and version 2.1.2.0.

**DS200**® is a polling place paper-based voting system, specifically a digital scanner and tabulator that simultaneously scans the front and back of a paper ballot and/or vote summary card in any of four orientations for conversion of voter selection marks to electronic cast vote records (CVR).

**DS300**® is a polling place paper-based voting system, specifically a digital scanner and tabulator that simultaneously scans the front and back of a paper ballot and/or vote summary card in any of four orientations for conversion of voter selection marks to electronic cast vote records.

**DS450**® is a central scanner and tabulator that simultaneously scans the front and back of a paper ballot and/or vote summary card in any of four orientations for conversion of voter selection marks to electronic CVRs.

**DS850**® is a central scanner and tabulator that simultaneously scans the front and back of a paper ballot and/or vote summary card in any of four orientations for conversion of voter selection marks to electronic CVRs.

**DS950**® is a central scanner and tabulator that simultaneously scans the front and back of a paper ballot and/or vote summary card in any of four orientations for conversion of voter selection marks to electronic CVRs.

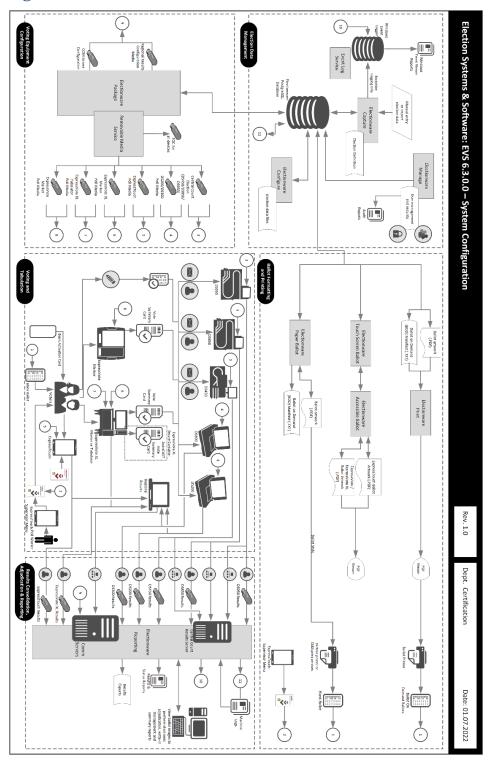

**Event Log Service (ELS)** monitors and logs users' interactions with the election management system. Events that happen when a connection to the database is not available are logged to the Windows operating system log through the ELS.

**Removable Media Service (RMS)** is a utility that runs in the background of the Windows operating system. RMS reads specific information from any attached USB devices so that an ES&S application such as Electionware can use that information for media validation purposes.

**Electionware® Regional Results** (Regional Results) is a standalone application that is deployed at Regional Sending Sites. For more efficient results reporting, the Regional Results software

then securely transmits the encrypted unofficial results collection files over a customer dedicated network.

**EVS 6.3.0.0 System Overview** 

# Certified System before Modification (<u>If applicable</u>):

#### EVS 6.2.0.0

# Changes addressed by modification

#### Hardware

#### **New Hardware**

- DS300: introduced the new polling place scanner and tabulator.
- DS300 Ballot Box: introduced for use with the DS300 tabulator only.

#### **Hardware Modifications**

- ExpressVote XL: added/updated the following components:
  - Added one-way printer roller
  - o Updated Paper Path Module (PPM) firmware
- DS450: added/updated the following components:
  - o Updated monitor with new video control board
  - Added reverse belt assembly
  - Added output tray stops to allow more room for 19" ballots
- DS950: added/updated the following components:
  - o Updated monitor with new video control board
  - Added risk-limiting audit number printer
  - o Added cutout with filler plate for future location of imprinter

#### **New Configuration Options**

- DS450/DS950 Printer. The Brother printer is a new laser report printer configuration option.
- DS450/DS950 UPS. The CyberPower uninterruptible power supply is a new UPS configuration option.
- DS450/DS950 network cable. The Ethernet network cable is now optional in the certified configuration.
- DS450 Cart. The DS450 is now configured on the Central Count cart.

#### Software/Firmware Changes

• Customize Write-in Cells

Added the ability to customize Write-in cells in Electionware Touch Screen Ballot to fit more offices on a page for the ExpressVote XL.

Impacted products:

- Electionware
- ExpressVote XL
- Park the Vote Summary Card

Added the ability to park the vote summary card under glass when the printed card is reinserted into the ExpressVote XL.

Impacted products:

- o Electionware
- ExpressVote XL
- Reduce Poll worker Intervention

Implemented an option on the ExpressVote XL to allow the voter to quit the vote session after printing the vote summary card without poll worker intervention:

- Electionware
- ExpressVote XL
- Multi-Language Vote Summary Card

Added configurable options for printing the contest and candidate names in English and the voter's selected language on vote summary cards.

Impacted products:

- o Electionware
- o ExpressVote HW1.0
- ExpressVote HW2.1
- o ExpressVote XL
- Team Write-in Contest Type

Added the ability to enter two write-in names for contests where two candidates use one voting target.

Impacted products:

- ExpressVote HW1.0
- ExpressVote HW2.1
- ExpressTouch
- ExpressVote XL
- DS200 Label Change

Renamed "DS200" labels to "Poll Place Count".

Impacted products:

- Electionware
- Regional Results
- Security

Implement a Cisco firmware update to address security vulnerabilities on the Cisco RV340 VPN Router.

Impacted products:

Election Management System

#### DS200

- Operating System
  - Upgraded the DS200 operating system to Linux (Yocto).

#### DS950

- Risk limiting Audit
  - o Implemented DS950 imprinter functionality for risk limiting audits.

#### Electionware

- System Limit
  - Increased Precinct ID limit from 9900 to 9999.
- Adjudication
  - Enabled adjudication of write-ins on the vote summary card in Ballot Review in the Electionware Reporting module.

#### ExpressVote XL

- Side by Side Review
  - Introduced the ability to display the full on-screen ballot during voter review when the printed vote summary card is reinserted into the ExpressVote XL, which allows a side-by-side comparison.

#### Mark Definition

ES&S' declared mark recognition for the DS200, DS300, DS450, DS850 and DS950 is a mark across the oval that is 0.02" long x 0.03" wide at any direction.

### **Tested Marking Devices:**

Bic Grip Roller Pen

# Language Capability

System supports English, Spanish, Chinese, Korean, Japanese, Hindi, Bengali, Vietnamese, Tagalog, Creole, Russian, French, Gujarati (not supported by poll place tabulators), Punjabi (not supported by poll place tabulators)

# **Proprietary Components Included**

# **Component Limitations**

### **ExpressVote**

1. Capacities exceed all documented limitations for the ES&S election management, vote tabulation and reporting system. For this reason, election management system and

ballot tabulator limitations define the boundaries and capabilities of the ExpressVote system as the maximum capacities of the ExpressVote are never approached during testing.

- 2. Does not offer open primary support based on the ES&S definition of Open Primary, which is the ability to select a party and vote based on that party.
- 3. ExpressVote vote summary cards using the high-capacity barcode are limited to 630 or fewer oval positions.
- 4. Does not support Massachusetts Group Vote.
- 5. Does not support Universal Primary Contest.
- 6. Does not support Multiple Target Cross Endorsement.
- 7. Does not support Judges Initials boxes.
- 8. ExpressVote does not support 19-inch cards with ballot stubs.

#### **ExpressVote XL**

- Capacities exceed all documented limitations for the ES&S election management, vote tabulation and reporting system. For this reason, election management system and ballot tabulator limitations define the boundaries and capabilities of the ExpressVote XL system as the maximum capacities of the ExpressVote XL are never approached during testing.
- 2. Does not offer open primary support based on the ES&S definition of Open Primary, which is the ability to select a party and vote based on that party.
- 3. ExpressVote XL vote summary cards using the high-capacity barcode are limited to 630 or fewer oval positions.
- 4. Does not support Massachusetts Group Vote.
- 5. Does not support Universal Primary Contest.
- 6. Does not support Judges Initials boxes.
- 7. In a general election, ExpressVote XL screen can hold 32 party columns if set up as columns or 16 party rows if set up as rows.
- 8. ExpressVote XL does not support 19-inch cards with ballot stubs.
- 9. ExpressVote XL does not support 17-inch cards with ballot stubs.

#### ExpressTouch

- Capacities exceed all documented limitations for the ES&S election management, vote tabulation and reporting system. For this reason, election management system limitations define the boundaries and capabilities of the ExpressTouch system as the maximum capacities of the ES&S ExpressTouch are never approached during testing.
- 2. Does not offer open primary support based on the ES&S definition of Open Primary, which is the ability to select a party and vote based on that party.
- 3. Does not support Massachusetts Group Vote.
- 4. Does not support Universal Primary Contest.
- 5. Does not support Multiple Target Cross Endorsement.

#### **Electionware**

- Electionware software field limits were calculated based on an average character width
  for ballot and report elements. Some uses and conditions, such as magnified ballot
  views or combining elements on printed media or ballot displays, may result in field
  limits (and associated warnings) lower than those listed.
- 2. Ballot Images function is limited to 250 districts per export.
- 3. Supports the language and special characters listed in the System Overview, Attachment 1. Language special characters other than those on this list may not appear properly when viewed on equipment displays or reports.

#### **Electionware Paper Ballot**

- 1. The paper ballot code channel, which is the series of black boxes that appear between the timing track and ballot contests, limits the number of available ballot variations depending on how a jurisdiction uses this code to differentiate ballots. The code can be used to differentiate ballots using three different fields defined as: Sequence (available codes 1-16,300), Type (available codes 1-30), or Split (available codes 1-18).
- 2. For paper ballots, if Sequence is used as a ballot style ID, it must be unique electionwide and Split code will always be 1. In this case, the practical style limit would be 16,300.
- 3. The ExpressVote activation card has a ballot ID consisting of three different fields defined as: Sequence (available codes 1-16,300), Type (available codes 1-30), or Split (available codes 1-18).
- 4. Grid Portrait and Grid Landscape ballot types are New York specific and not for general use.

#### **DS200**

- 1. Configured for an early vote station does not support precinct level results reporting. An election summary report of tabulated vote totals is supported.
- 2. Storage limitation for write-in ballot images is 3,600 images. Each ballot image includes a single ballot face, or one side of one page.
- 3. Write-in image review requires a minimum 1GB of onboard RAM.
- 4. To successfully use the write-in report, ballots must span three or more vertical columns. If the column is greater than 1/3 of the ballot width (two columns or less), the write-in image will be too wide to print on the tabulator report tape.

#### **DS300**

- 1. Configured for an early vote station does not support precinct level results reporting. An election summary report of tabulated vote totals is supported.
- 2. Storage limitation for write-in ballot images is 3,600 images. Each ballot image includes a single ballot face, or one side of one page.

3. To successfully use the write-in report, ballots must span three or more vertical columns. If the column is greater than 1/3 of the ballot width (two columns or less), the write-in image will be too wide to print on the tabulator report tape.
